

C-36500 (Muntz Metal)

EQUIVALENT SPECIFICATION

Grade: C-36500 (Muntz Metal)

Code: ASTM B-124

CHEMICAL SPECIFICATION

Cu	Pb	Fe	Zn	Imp	Sn				
58 - 61	0.25 - 0.7	0.15	Rem	0.4	0.25				

DESCRIPTION:

C36500 Muntz Metal is a Copper-based alloy, with additions of Silver, Zinc, Tin, and Lead. C365 Muntz Metal has good strength and corrosion resistance but better machinability as compared to the yellow brasses, due to the addition of Lead. Generally used in Marine structural applications, C365 Muntz Metal has numerous applications where extensive machining and good corrosion resistance is a priority. Also used in architectural applications where its color and finish is desired (red gold hue).

TYPICAL APPLICATIONS:

Builders Hardware, Consumer, Building, Industrial

PRODUCT

Rods & Bars
Hollow
Sections & Profiles
Ingots
Billets

SIZE RANGE

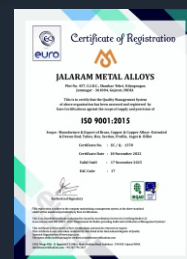

Dia. 8.00 mm to 101.00 mm

OTHER ALLOYS

Free Cutting Brass
Forging Brass
Naval Brass
Leaded Brass

Lead Free Brass
Silicon Brass
Eco Brass
DZR Brass

Low Leaded Brass
High tensile Brass
Bismuth Bronze
Copper & Copper Alloys
