

C-38500 (Architectural Bronze)

EQUIVALENT SPECIFICATION

Grade: C-38500 (Architectural Bronze)
Code: ASTM B-455

CHEMICAL SPECIFICATION

Cu	Pb	Fe	Zn	Imp					
55 - 59	2.5 - 3.5	0.35	Rem	0.5					

DESCRIPTION:

C38500 brass is an architectural bronze wrought alloy revered for its golden luster and exceptional machinability. C38500 brass alloy products provide enhanced aesthetics for interior and exterior building and architectural hardware and trim applications. c38500 Brass Advantages. Brass c38500 is an intrinsically beautiful and aesthetically pleasing brass alloy metal that delivers exceptional benefits for various applications. Brass alloy C38500 advantages include:

TYPICAL APPLICATIONS:

Extruded shapes, Hardware and trim, Frames, Hinges, Thresholds, Elevator sills, Columns, Balusters, Cornices, Door handles, Cladding

PRODUCT

Rods & Bars
Hollow
Sections & Profiles
Ingots
Billets

SIZE RANGE

Dia. 8.00 mm to 101.00 mm

OTHER ALLOYS

Free Cutting Brass
Forging Brass
Naval Brass
Leaded Brass

Lead Free Brass
Silicon Brass
Eco Brass
DZR Brass

Low Leaded Brass
High tensile Brass
Bismuth Bronze
Copper & Copper Alloys
