

C33500

EQUIVALENT SPECIFICATION

Grade: C33500
Standard: ASTM B-453

CHEMICAL SPECIFICATION

Cu	Pb	Fe	Zn	Imp					
62 - 65	0.25 - 0.7	0.15	Rem	0.4					

DESCRIPTION:

C33500 brass is a brass formulated for primary forming into wrought products. CW604N is the EN numeric designation for this material. C33500 is the UNS number. Additionally, the EN chemical designation is CuZn37Pb0,5.

TYPICAL APPLICATIONS:

Used for screw machine products, as for knurling, peening, crimping, and thread rolling. Typical uses include hose fittings, watch, clock and lock parts, bicycle spoke nipples and plumbing valve components.

PRODUCT

Rods & Bars
Hollow
Sections & Profiles
Ingots
Billets

SIZE RANGE

Dia. 8.00 mm to 101.00 mm

OTHER ALLOYS

Free Cutting Brass
Forging Brass
Naval Brass
Leaded Brass

Lead Free Brass
Silicon Brass
Eco Brass
DZR Brass

Low Leaded Brass
High tensile Brass
Bismuth Bronze
Copper & Copper Alloys
