

C34200

EQUIVALENT SPECIFICATION

Grade: C34200

Standard: ASTM B-121

CHEMICAL SPECIFICATION

Cu	Pb	Fe	Zn	Imp					
62 – 65	1.5 – 2.5	0.15	Rem	0.4					

DESCRIPTION:

C34200 brass is a brass formulated for primary forming into wrought products. CW601N is the EN numeric designation for this material. C34200 is the UNS number. Additionally, the EN chemical designation is CuZn35Pb2. And the British Standard (BS) designation is CZ131.

TYPICAL APPLICATIONS:

Used for screw machine products, as for knurling, peeling, crimping, and thread rolling. Typical uses include hose fittings, watch, clock and lock parts, bicycle spoke nipples and plumbing valve components.

PRODUCT

Rods & Bars
Hollow
Sections & Profiles
Ingots
Billets

SIZE RANGE

Dia. 8.00 mm to 101.00 mm

OTHER ALLOYS

Free Cutting Brass
Forging Brass
Naval Brass
Leaded Brass

Lead Free Brass
Silicon Brass
Eco Brass
DZR Brass

Low Leaded Brass
High tensile Brass
Bismuth Bronze
Copper & Copper Alloys
