

C3601

EQUIVALENT SPECIFICATION

Grade: C3601

Standard: JIS H3250

CHEMICAL SPECIFICATION

Cu	Pb	Fe	Zn	Imp	Sn				
59 - 63	1.8 - 3.7	0.3	Rem	0.5	Fe+5n 0.5				

DESCRIPTION:

C3601 Copper Alloy, also known as Brass 3601 or Free-Cutting Brass, is a special copper alloy known for its excellent machinability. The primary components of this alloy include copper (Cu), zinc (Zn), and a small amount of lead (Pb), which significantly enhances its machinability, especially in applications requiring high precision.

TYPICAL APPLICATIONS:

Shafts, Valves, Gears, Electronic Components, Connectors & Accessories

PRODUCT

Rods & Bars
Hollow
Sections & Profiles
Ingots
Billets

SIZE RANGE

Dia. 8.00 mm to 101.00 mm

OTHER ALLOYS

Free Cutting Brass
Forging Brass
Naval Brass
Leaded Brass

Lead Free Brass
Silicon Brass
Eco Brass
DZR Brass

Low Leaded Brass
High tensile Brass
Bismuth Bronze
Copper & Copper Alloys
