

CZ122

EQUIVALENT SPECIFICATION

Grade: CZ122

Standard: BS 2874

CHEMICAL SPECIFICATION

Cu	Pb	Zn	Imp						
56.5 - 58.5	1.5 - 2.5	0.3	Rem	0.7					

DESCRIPTION:

Jalaram Metal Alloys CZ122 is classed as a stamping brass with excellent hot forming properties and high machinability. With these characteristics, this particular alloy is used extensively in the production of more complex hot pressed components. The material is mainly supplied as bar for forging stock although it is also free machining - the sheet equivalent of CZ122 is CZ120.

TYPICAL APPLICATIONS:

Automotive components, Precision machined components, Hot forged and pressed components, Valve parts, Architectural hardware, Speciality fasteners

PRODUCT

Rods & Bars
Hollow
Sections & Profiles
Ingots
Billets

SIZE RANGE

Dia. 8.00 mm to 101.00 mm

OTHER ALLOYS

Free Cutting Brass
Forging Brass
Naval Brass
Leaded Brass

Lead Free Brass
Silicon Brass
Eco Brass
DZR Brass

Low Leaded Brass
High tensile Brass
Bismuth Bronze
Copper & Copper Alloys
