

## CuZn42Pb2

### EQUIVALENT SPECIFICATION

Grade: CuZn42Pb2

Code: Navy Standard (Customized)

### CHEMICAL SPECIFICATION

Cu	Pb	Fe	Zn	Imp					
56.5 - 60	0.6 - 2.0	0.3	Rem	0.2					

### DESCRIPTION:

"CuZn42Pb2" refers to a type of brass alloy, specifically a forging brass rod, with a chemical composition consisting of copper, zinc, and lead. The "CuZn42Pb2" designation indicates that it contains copper (Cu), zinc (Zn), and lead (Pb), with the percentage of zinc and lead being 42 and 2 respectively.

### TYPICAL APPLICATIONS:

This type of brass is commonly used for forging and manufacturing various components like valves, hardware, and defense components.

### PRODUCT

Rods & Bars  
Hollow  
Sections & Profiles  
Ingots  
Billets

### SIZE RANGE

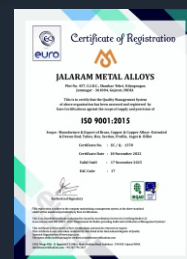

Dia. 8.00 mm to 101.00 mm

### OTHER ALLOYS

Free Cutting Brass  
Forging Brass  
Naval Brass  
Leaded Brass

Lead Free Brass  
Silicon Brass  
Eco Brass  
DZR Brass

Low Leaded Brass  
High tensile Brass  
Bismuth Bronze  
Copper & Copper Alloys
