

FHTB2

EQUIVALENT SPECIFICATION

Grade: FHTB2
Standard: IS 6912

CHEMICAL SPECIFICATION

Cu	Pb	Fe	Zn	Imp.	Sn	Al	Mn		
56 - 61	0.5 - 1.5	0.3 - 1.25	Rem	0.5	0.2 - 0.8	0.3 - 2.0	0.5 - 2.0		

DESCRIPTION:

FHTB2 brass, also known as 6912 FHTB2, is a high-strength, hot-workable, and Machine-able brass alloy. It's sometimes referred to as a manganese bronze due to its high strength and hot-workability. This alloy is a duplex or alpha/beta alloy of copper and zinc.

TYPICAL APPLICATIONS:

Valve, Pump, General Engineering, Automotive and other industry, etc.

PRODUCT

Rods & Bars
Hollow
Sections & Profiles
Ingots
Billets

SIZE RANGE

Dia. 8.00 mm to 101.00 mm

OTHER ALLOYS

Free Cutting Brass
Forging Brass
Naval Brass
Leaded Brass

Lead Free Brass
Silicon Brass
Eco Brass
DZR Brass

Low Leaded Brass
High tensile Brass
Bismuth Bronze
Copper & Copper Alloys
