

MBA2 - Cr

EQUIVALENT SPECIFICATION

Grade: MBA2 - Cr
Standard: Manganese Bronze

CHEMICAL SPECIFICATION

| Cu | Pb | Cd | Zn | Imp. | Sn | Bi | Al | Cr | |
|---------|------|-----------|-----|-----------|-----------|-----|-----------|------------|--|
| 60 - 64 | 0.15 | 2.5 - 3.5 | Rem | 0.3 - 0.5 | 1.9 - 3.5 | 0.5 | 0.6 - 1.2 | 0.1 - 0.25 | |

DESCRIPTION:

Jalaram Metal Alloys Make MBA2 Cr - Manganese bronze is a type of bronze alloy that contains added manganese, aluminium, zinc, and iron. Known for its strength, wear resistance, and corrosion resistance, manganese bronze is widely used in marine applications, and for high-load, high-wear components.

TYPICAL APPLICATIONS:

Bushing and Synchronizer rings.

PRODUCT

Rods & Bars
Hollow
Sections & Profiles
Ingots
Billets

SIZE RANGE

Dia. 8.00 mm to 101.00 mm

OTHER ALLOYS

Free Cutting Brass
Forging Brass
Naval Brass
Leaded Brass

Lead Free Brass
Silicon Brass
Eco Brass
DZR Brass

Low Leaded Brass
High tensile Brass
Bismuth Bronze
Copper & Copper Alloys
